

## INFORMATION FOR AUTHORS

The journal is dedicated to publishing original theoretical and applicative research results and overviews on the current research status in Automation, Computer Science and Applied Informatics.

The Bulletin has the periodicity of four issues per year starting with 2006.

The access to publication of research results is open to researchers all over the world. Results published firstly here are especially encouraged. The Editorial Board encourages also the submission of papers authored by young researchers, Master or PhD students.

The Bulletin invites and accepts papers presented in the framework of congresses, symposia and workshops carefully selected by the International Program Committees of these scientific meetings but only after their proposal and in the conditions of avoiding copyright problems. These proposed papers have to be subject to the normal review procedure in order to have the papers accepted for publication.

The following conditions have to be fulfilled by a paper in order to be accepted for publication in this journal:

- Progress of review steps, finalized by a publication proposal,
- The paper must contain original elements in the field it belongs,
- The paper should not have been previously or simultaneously submitted to other journals; to avoid any misunderstandings the editing format will include the receipt data and the acceptance for publication data,
- The paper must meet strictly the editing format required by the Editorial Board.

All accepted papers are published in the order set by the Editorial Board but not later than 6 months after the acceptance.

The contents of each number together with the abstracts, keywords and references (starting with 2006) are accessible on the journal site.

Full papers can be asked only from the authors.

The reviewing process involves the following stages:

- Receiving the paper in the required format and using the imposed technical instructions for authors; the full paper manuscript will be submitted electronically in PDF format; the editors will acknowledge the paper's arriving in good conditions, mark the date, and inform the authors about that.
- Within maximum 15 days the editors will nominate the referees and address the paper manuscript to them; peer reviewing will be accorded to each paper by three referees; in some cases the paper may be reviewed by two referees; in cases of uncertainty, the editorial board will discuss the paper and take the final decision upon publication.
- The referees will use a specific reviewing template; the paper may be recommended for:

- Acceptance without any changes; in that case the authors will be asked to send the paper electronically in the required Microsoft Word DOC format according to authors' instructions.
  - Acceptance with minor changes; if the authors follow the conditions imposed by referees the paper will be sent in the required Microsoft Word DOC format.
  - Acceptance with major changes; if the authors follow completely the conditions imposed by referees the paper will be sent in the required Microsoft Word DOC format.
  - Rejection; in that case the reasons for rejection will be transmitted to authors along with some suggestions for future improvements (if that will be considered necessary).
- In all cases, the required changes will be transmitted to authors; the changes may be accepted totally or partially by the author(s); in the latter case, the referees' conditions may be challenged by the author(s) and the paper submitted for a second reviewing.
  - The date of publishing acceptance will be communicated to author(s) and printed on the published paper.
  - The final camera-ready format as requested by the editors has to be transmitted by authors within 30 days from acceptance. The special cases have to be adjusted according to the editors' demands.

Detailed format information for the preparation of the camera-ready version as Microsoft Word DOC file containing the Instructions for authors is placed at the journal's webpage at <http://www.ac.upt.ro/journal/>.

Please send the paper to Scientific Buletin of "Politehnica" University of Timisoara, Transactions on Automatic Control and Computer Science, in Microsoft Word DOC format (preferred) or PDF format (Microsoft Word DOC only for CAMERA-READY version) to:
